Cautions:

! Searching? You cannot use the Menu search for case number, party, or attorney searches

! Open Tabs? Using the Related Case link from the Detail tab of the case will swap out the display instead of opening a new tab

! Command Legend? It is not a breadcrumb or history, but a list of open pages (like a web browser with multiple active tabs)

! Same Case Open Twice? Multiple instances of the same case in the Command Legend is not a good idea if you are editing

! Case Refresh? There is no F5 equivalent, so change case tabs to commit any changes you've made

More Cautions:

! Merging Forms? Make sure your screen is maximized so the form editing tool will display everything you need to see

! Editing Tools? The document viewer provides editing tools - a different subset for PDFs than for TIFFs

! Linking Documents? If you have multiple documents open in the Document Viewer, the DISPLAYED document is the one you are linking to a case

! Where's My Workflow Queue? The Workflow Queue for documents will now be found in the Tasks tab

! Unrelated Documents? If a document is not related to an event in Odyssey, it does not show in re:SearchNM, but does in SOPA
